Goals of Revocation Reason Proposal

Clarify TLS BR Sec. 4.9.1.1: Reorganize and refine Section 4.9.1.1 to better define revocation reasons and reason codes, reducing ambiguity.

Re-align Use of Some Reason Codes: Realign some revocation reasons into coherent categories:

key soundness (1=keyCompromise);

identity accuracy (9=privilegeWithdrawn) DCV, CAA, and authority;

and **administrative / lifecycle management** (4=superseded) for more predictable and meaningful CRL data.

Improve Handling of Benign Cases: Direct use of CRLReason #4 (superseded) for minor compliance or administrative revocations, including for many mass revocations.

Support Ecosystem Consistency and Transparency: Simplify overlapping or duplicative language, use RFC 5280 codes, and create clearer mapping for data analysis of revocations.

CA Inclusion Requests - <https://wiki.mozilla.org/CA/Dashboard>

Status	Count
Received - Initial Status (CA Providing Data)	16
Information Verification (Verification by Root Store)	15
CP/CPS Review	3

In Public Discussion	0
Pending Approval	0
Recently Approved (OISTE)	1
TOTAL	35

CA Compliance - https://wiki.mozilla.org/CA/Incident_Dashboard

Type	Count
[audit-finding] (PKloverheid and SwissSign)	31
[ca-misissuance]	1
[crl-failure] / [ocsp-failure]	5
[disclosure-failure]	1
[dv-misissuance]	2
[leaf-revocation-delay]	2
[policy-failure]	9
Total	50

Questions?

[Mozilla Root Store Policy](#) - will be updated in 2026
